Allowable Subject Matter

1. Claims 1-23 allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 12, 23, the cited prior art of record fails to teach a method for producing porous Group III-V material comprises/consists the step of forming the porous Group III-V material by etching a Group III-V material surface having a thin discontinuous layer of metal formed thereon in a HF and oxidant solution, said etching being conducted without external electrical bias. Since the closest cited prior art of Peng et al (US 5,895,223) discloses a method for etching a Group III-V material surface having a thin layer of metal formed thereon in a H₃PO₄ solution, said etching being conducted without external electrical bias to pattern the Group II-V material and reduce the variation in roughness of the etching surface (col 2, lines 23-30), one skilled in the art would have not found it obvious to employ Peng's method to form the porous Group III-V material.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
